

# AIRPORT CERTIFICATION INFORMATION BULLETIN

Attached is a copy of Advisory Circular 150/5210-20, "Announcement of Availability - NFPA Aircraft Familiarization Charts Manual".

The National Fire Protection Association (NFPA) has developed aircraft familiarization charts to be used by aircraft emergency response services. The charts provide essential information needed to assess accurately the nature of special situations while performing aircraft rescue and firefighting (ARFF) services. The charts contain the following important information:

- Understanding of the operation of all doors and exit hatches from both the exterior and interior of the aircraft.
- Location of forcible entry points.
- Location of batteries, fuel tanks, oil tanks and hydraulic lines.
- Operation of escape chutes.

Copies of the NFPA Aircraft Familiarization Charts Manual may be purchased from:

National Fire Protection Association  
1 Batterymarch Park  
P.O. Box 9101, Quincy, MA, 02269-9101.

For price and ordering information, call (800) 344-3555.

*Reminder...*

*Are your ARFF personnel properly trained on all of the air carrier aircraft that currently utilize the airport?*

DAVID L. BENNETT  
Director, Office of Airport Safety and Standards
